

HeartSine®

# FORWARD HEARTS

**“Forward Hearts”** enables individuals who have survived a sudden cardiac arrest event as a result of a HeartSine defibrillator to save another’s life by donating a samaritan® Public Access Defibrillator to the charity or organization of their choice. To celebrate the life-saving event, the donation will be made in the survivor’s name, in HeartSine’s name, and in the distributor’s name.

HeartSine believes so strongly in its defibrillation technology, and the need to have readily available AEDs in public places, that it created this program to show the company’s ongoing commitment to saving lives.

### How The Program Works:

When a HeartSine AED device is used to save a life, the distributor works to connect everyone involved – the company site, the saved individual, and HeartSine – to begin the donation program. The saved individual can choose to make his/her donation to the charity anonymously and confidentially, or as part of a public announcement.
